Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-16 have been canceled.

Applicant's election with traverse of claims 17-27 in the reply filed on 6/29/06 is acknowledged. The traversal is on the ground(s) that the fields of search are believed to be co-extensive for the three groups identified by the Examiner. This is not found persuasive because both groups II and III would required a different field search in a manner that it is not likely to result in finding art pertinent to the other inventions event though the inventions are classified together.

Claims 28-36 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected groups, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 6/29/06.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 26 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 26, "the distal end" lacks antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3721

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Plyley 5,816,471.

Plyley discloses a tool assembly comprising a pair of jaws including a first jaw and a second jaw, each of the jaws having a proximal end and a distal end, the first and second jaws being movable in relation to the other between a spaced position and an approximated position; first and second cam followers 211,212 supported on one of the first and second jaws; and an approximation member 46B including at least one cam surface 201,203 positioned to engage the first and second cam followers, the approximation member being movable to move the at least one cam surface in relation to the first and second cam followers; wherein the approximation member is movable to move the at least one cam surface in relation to the first and second cam followers to effect movement of the first and second jaws between the spaced position and the approximated position as shown in Fig. 6 (claim 17); wherein the first jaw includes an anvil 16 and the second jaw includes a cartridge assembly 14 (claim 18); wherein the at least one cam surface includes first and second cam channel 201,203 (claim 19); wherein the at least one cam channel includes first and second cam channels 211,217 (claim 20); wherein the approximation member includes a flat plate 46 having the at least one cam surface formed therein as shown in Fig. 5A (claim 21); wherein the first jaw includes a longitudinal slot formed in its proximal end 204 as shown in Fig. 8 (claim 22); wherein the first and second cam followers are supported on the proximal end 204 of the first jaw and extend across the longitudinal slot adjacent at least one cam surface as shown in Figs.

Art Unit: 3721

6 and 8 (claim 23); the first cam follower extending through the first cam channel and the second cam follower extending through the second cam channel as shown in Fig. 6 (claim 24); a body portion 17, wherein the tool assembly attached to the body portion by an articulation joint 17,18 (claim 25); wherein the body portion forms a distal end of a surgical stapling device and the proximal portion of a disposable loading unit 112 (claims 26-27).
